## Solar Power Kit Connecting

## FAQ

- **What electrical appliances can work with 750W power inverter.**  
TV, Refrigerator, Iron, Computer, Laptop, Fan, Speakers, vacuum clean, Lights, washing machine, Phone Charger, Water purifier etc.
- **Will this kit work with a 12V or 24V battery?**  
This is a 12V battery charging system only. Please call Nature Power Customer Service for more 24V system configuration.
- **How do solar system work?**  
The panel's photovoltaic cells convert the energy in sunlight to electricity, the electricity is then stored in the battery and an inverter will allow you to plug in appliances. there is 4 major components needed to set up your solar off grid system. Solar panels, charge controller to control the charge to the battery bank, a battery for power storage and an inverter to transfer DC power from the battery to an AC power.
- **Does the panels need to be in direct sun to work?**  
No, although solar panels produce the highest wattage output in direct sunlight, they will still produce power on cloudy days.
- **Do I need a battery to store Power?**  
Yes, a battery is needed to store the power from the solar panel, inverter will also connect to the battery.
